### About Eco-Schools

Eco-Schools is a programme for environmental management and certification, designed to implement sustainable development education in schools by encouraging children and youth to take an active role in how their school can be run for the benefit of the environment.

The Eco-Schools Programme employs an holistic, participatory approach, combining learning and action, thus providing an effective method for improving the environments of schools and producing actual awareness raising and behavioral change in young people, school staff, families, local authorities, and so on, having significant repercussions in the local communities.

### News

#### Ireland: 13 years of Eco-Schools

Over 270,000 second-level students across Ireland are taking part in the Green Schools Programme, and it's making a major difference to their wider community, writes PETER MCGUIRE of the Irish Times Newspaper.

#### Sweden - Eco-Schools manifestation at an international conference

EU as Global Actor - Lund Calling 2009, was an international event in association with the Swedish Presidency of the European Union that took
